

Isabelle Y6 - Westwood CP

A gaggle of Canada Geese (left), I think a family. I'm not sure if they are there all year around. the photos were taken at the Buckley common pond. My favourite picture is of the duck (below), I love it's colours.

Black Headed Gull - This black headed gull reminds me of our visits from the Song Bird people who visited Westwood C.P. from Chester Zoo. They told us many amazing facts about many species of birds and songbirds in particular.

Lots of sounds can be heard when you visit Buckley Common and a lot of the time it is from this little pair!

There are many colourful flowers , plants, grasses and reeds that grow around Buckley Common and particularly around the edges of the ponds. This is my favourite.
